Pending before the Court are a motion for class certification filed by Plaintiffs Alex Ang and Lynne Streit, Dkt. No. 102, as well as a motion for sanctions filed by Defendant Bimbo Bakeries USA, Inc., Dkt. No. 138. For the reasons set forth below, the Court **GRANTS IN PART** and **DENIES IN PART** the motion for class certification, and **DENIES** the motion for sanctions.

**I. PLAINTIFFS’ MOTION FOR CLASS CERTIFICATION**

**A. Background**

**1. Class Allegations**

Plaintiffs seek to certify four classes of California consumers who purchased various food products manufactured by Defendant. Plaintiffs allege that certain labels on some of the food products do not comply with California’s Sherman Food, Drug, and Cosmetic Law, Cal. Health & Safety Code §§ 109875, *et seq.* (“Sherman Law”). Based on these violations, Plaintiffs bring causes of action under California’s consumer protection laws: the Unfair Competition Law, Cal. Bus. & Prof. Code §§ 17200, *et seq.* (“UCL”); the False Advertising Law, Cal. Bus. & Prof. Code §§ 17500, *et seq.* (“FAL”); and the Consumer Legal Remedies Act, Cal. Civ. Code §§ 1750 *et seq.* (“CLRA”). Plaintiffs seek certification under Federal Rules of Civil Procedure 23(b)(2) and

1 23(b)(3).

2 More specifically, Plaintiffs allege that they purchased food products manufactured and  
 3 sold by Defendant that improperly: (1) applied the American Heart Association’s “Heart-Check  
 4 Mark” without acknowledging that the mark is a paid endorsement; (2) labeled products as a  
 5 “good” or “excellent source of whole grain”; (3) labeled products as “bread,” even though they  
 6 contain added coloring; and (4) labeled products as “100% Whole Wheat,” even though they were  
 7 made with non-whole wheat flour. *See* Dkt. No. 102 at 1. They accordingly seek to certify four  
 8 separate classes corresponding to these violations that include all California consumers who  
 9 bought the same products (or products substantially similar to the products) that they purchased at  
 10 any time from March 18, 2009 to the present. *Id.* at i-ii. The proposed class definitions are as  
 11 follows:

- 12 (1) **“Heart-Check Mark” Class:** All consumers in the State of California who,  
 13 from March 18, 2009 to the present, purchased Thomas’ Plain Bagel Thins,  
 14 Thomas’ 100% Whole Wheat Bagel Thins, Thomas’ Everything Bagel  
 15 Thins, Arnold 100% Whole Wheat Bread, Arnold 12 Grain Bread, or  
 16 Arnold Healthy Multi Grain Bread bearing the American Heart Association  
 17 Heart-Check Mark on the label.

18 **Purchased Product:** Plaintiff Ang purchased Thomas’ Plain Bagel Thins.

19 **Substantially Similar Products:** Thomas’ 100% Whole Wheat Bagel  
 20 Thins, Thomas’ Everything Bagel Thins, Arnold 100% Whole Wheat Bread,  
 21 Arnold 12 Grain Bread, and Arnold Healthy Multi Grain Bread.

- 22 (2) **“Whole Grain” Class:** All consumers in the State of California who, from  
 23 March 18, 2009 to the present, purchased Sara Lee Classic 100% Whole  
 24 Wheat Bread, Sara Lee 100% Whole Wheat Bread, Sara Lee Soft & Smooth  
 25 Whole Grain White Bread, or Sara Lee Soft & Smooth 100% Whole Wheat  
 26 Bread with labels containing the phrases “excellent source of whole grain”  
 27 or “good source of whole grain.”

28 **Purchased Products:** Plaintiffs both purchased Sara Lee Classic 100%  
 Whole Wheat Bread, and Plaintiff Streit also purchased Sara Lee 100%  
 Whole Wheat Bread.

**Substantially Similar Products:** Sara Lee Soft & Smooth Whole Grain  
 White Bread, Sara Lee Soft & Smooth 100% Whole Wheat Bread.

- (3) **“Added Coloring” Class:** All consumers in the State of California who,  
 from March 18, 2009 to the present, purchased Bimbo Original Toasted

1 Bread, Bimbo Double Fiber Toasted Bread, Arnold Marble Jewish Rye  
2 Bread, Arnold Pumpnickel Jewish Rye Bread, Oroweat Dark Rye Bread,  
3 Oroweat Sweet Hawaiian Bread, Stroehmann Deli Soft Rye – No Seeds,  
4 Stroehmann Deli Soft Rye – Seeds, Thomas’ Cinnamon Raisin Swirl  
5 Toasting Bread, or Thomas’ Cranberry Swirl Toasting Bread containing  
6 added coloring.

7 **Purchased Products:** Plaintiff Ang purchased Bimbo Original Toasted  
8 Bread.

9 **Substantially Similar Products:** Bimbo Double Fiber Toasted Bread,  
10 Arnold Marble Jewish Rye Bread, Arnold Pumpnickel Jewish Rye Bread,  
11 Oroweat Dark Rye Bread, Oroweat Sweet Hawaiian Bread, Stroehmann  
12 Deli Soft Rye - No Seeds, Stroehmann Deli Soft Rye – Seeds, Thomas’  
13 Cinnamon Raisin Swirl Toasting Bread, or Thomas’ Cranberry Swirl  
14 Toasting Bread

- 15 (4) **“Whole Wheat Class”:** All consumers in the State of California who, from  
16 March 18, 2009 to the present, purchased Sara Lee 100% Whole Wheat  
17 Bread, Sara Lee Classic 100% Whole Wheat Bread, Arnold 100% Whole  
18 Wheat Pocket Thins Flatbread, Arnold Bakery Light - 100% Whole Wheat  
19 Bread, Bimbo 100% Whole Wheat Tortillas, Brownberry 100% Whole  
20 Wheat Pocket Thins Flatbread, Thomas’ 100% Whole Wheat Bagels,  
21 Thomas’ 100% Whole Wheat Bagel Thins Flatbread, Thomas’ 100%  
22 Whole Wheat Mini Bagels, Thomas’ Sahara 100% Whole Wheat Pita  
23 Pockets, Thomas’ Sahara 100% Whole Wheat Pita Pockets Mini Size,  
24 Thomas’ 100% Whole Wheat English Muffins, or Tia Rosa 100% Whole  
25 Wheat Tortillas.

26 **Purchased Products:** Plaintiff Ang purchased Sara Lee Soft & Smooth  
27 Whole Wheat White Bread and Sara Lee 100% Whole Wheat Bread;  
28 Plaintiff Streit purchased Sara Lee Classic 100% Whole Wheat Bread and  
Sara Lee 100% Whole Wheat Bread.

**Substantially Similar Products:** Arnold 100% Whole Wheat Pocket Thins  
Flatbread, Arnold Bakery Light – 100% Whole Wheat Bread, Bimbo 100%  
Whole Wheat Tortillas, Brownberry 100% Whole Wheat Pocket Thins  
Flatbread, Mrs. Baird's 100% Whole Wheat Bread, Mrs. Baird's 100%  
Whole Wheat Country Rolls, Thomas’s 100% Whole Wheat Bagels,  
Thomas’ 100% Whole Wheat Bagel Thins, Thomas’ 100% Whole Wheat  
Mini Bagels, Thomas’ Sahara 100% Whole Wheat Pita Pockets, Thomas’  
Sahara 100% Whole Wheat Pita Pockets Mini Size, Thomas’ 100% Whole  
Wheat English Muffins, and Tia Rosa 100% Whole Wheat Tortillas.

*Id.*; Dkt. No. 40 ¶¶ 50-51.<sup>1</sup>

---

<sup>1</sup> Plaintiffs exclude from class membership: (1) Defendant and its subsidiaries and affiliates; (2) governmental entities; and (3) the Court to which this case is assigned and its staff. Mot. at ii.

## 2. Procedural Posture

1  
2 Plaintiffs filed the operative Second Amended Complaint on November 4, 2013. Dkt. No.  
3 40 (“SAC”).<sup>2</sup> On March 13, 2014, the Court granted in part Defendant’s motion to dismiss the  
4 SAC, narrowing the claims for which Plaintiffs could seek relief. *See* Dkt. No. 58. Defendant  
5 answered the SAC on April 2, 2014. Dkt. No. 64.

6 On February 18, 2015, Plaintiffs filed this motion for class certification. Dkt. No. 102  
7 (“Mot.”). Defendant filed its opposition on April 4, 2015, Dkt. No. 121 (“Opp.”), and objected to  
8 some of the evidence Plaintiffs proffered in support of their motion, Dkt. Nos. 122, 123, 124. On  
9 April 17, 2015, Plaintiffs replied. Dkt. No. 130 (“Reply”). A week later, Defendant filed its  
10 objection to materials submitted by Plaintiffs in support of their reply. Dkt. No. 132. The Court  
11 heard argument on the class certification motion on May 6, 2015. Dkt. No. 133.

12 On March 31, 2016, the Court stayed this action pending the resolution of third-party  
13 appeals involving legal questions at issue in this case. Dkt. No. 164. On January 5, 2018, in  
14 response to an order to show cause, Dkt. No. 171, the parties jointly moved to lift the stay, Dkt.  
15 No. 172, and the Court granted the request, Dkt. No. 174. At a case management conference on  
16 February 6, 2018, the Court directed the parties to submit supplemental briefing regarding any  
17 relevant caselaw that had arisen during the stay. Dkt. No. 176. The parties submitted that briefing  
18 on March 23, 2018, Dkt. Nos. 180, 181, and the Court heard further argument on April 12, 2018,  
19 Dkt. No. 185.

### B. Legal Standard

20 Plaintiffs bear the burden of showing by a preponderance of the evidence that class  
21 certification is appropriate under Federal Rule of Civil Procedure 23. *See Wal-Mart Stores, Inc. v.*  
22 *Dukes*, 564 U.S. 338, 350-51 (2011). First, the plaintiffs must establish that each of the four  
23 requirements of Rule 23(a) are met: numerosity, commonality, typicality, and adequacy of  
24 representation. *Id.* at 349. Where the plaintiffs “succeed[] in establishing all four of the 23(a)  
25 elements, [they] must then satisfy one of the three requirements of Rule 23(b).” *Civil Rights Educ.*  
26  
27

28 <sup>2</sup> Plaintiffs filed the initial complaint on March 18, 2013. Dkt. No. 1.

1 & *Enforcement Ctr. v. Hospitality Props. Trust*, 867 F.3d 1093, 1103 (9th Cir. 2017).

2 As relevant here, Rule 23(b)(2) requires that “the party opposing the class has acted or  
3 refused to act on grounds that apply generally to the class, so that final injunctive relief . . . is  
4 appropriate respecting the class as a whole.” Rule 23(b)(3), on the other hand, requires a finding  
5 “that the questions of law or fact common to class members predominate over any questions  
6 affecting only individual members, and that a class action is superior to other available methods  
7 for fairly and efficiently adjudicating the controversy.” To determine whether a putative class  
8 action satisfies the requirements of Rule 23(b)(3), courts consider:

9 (A) the class members’ interests in individually controlling the  
prosecution or defense of separate actions;

10 (B) the extent and nature of any litigation concerning the  
11 controversy already begun by or against class members;

12 (C) the desirability or undesirability of concentrating the litigation of  
the claims in the particular forum; and

13 (D) the likely difficulties in managing a class action.

14 Fed. R. Civ. P. 23(b)(3)(A)-(D).

15 While a court’s “class-certification analysis must be rigorous and may entail some overlap  
16 with the merits of the plaintiff’s underlying claim, Rule 23 grants courts no license to engage in  
17 free-ranging merits inquiries at the certification stage.” *Amgen Inc. v. Conn. Ret. Plans & Trust*  
18 *Funds*, 568 U.S. 455, 465-66 (2013) (internal citations and quotation marks omitted). “Merits  
19 questions may be considered to the extent—but only to the extent—that they are relevant to  
20 determining whether the Rule 23 prerequisites for class certification are satisfied.” *Id.* (citation  
21 omitted). A trial court’s “broad discretion to certify a class . . . must be exercised within the  
22 framework of Rule 23.” *Zinser v. Accufix Research Inst., Inc.*, 253 F.3d 1180, 1186 (9th Cir.  
23 2001), *reh’g denied*, 273 F.3d 1266 (9th Cir. 2001) (citation omitted).

24 **C. Discussion**

25 Before considering whether Plaintiffs have satisfied the requirements of Rule 23, the Court  
26 turns to two threshold issues: Plaintiffs’ standing and the parties’ evidentiary objections.

27 **1. Standing**

28 As is true in all cases, Plaintiffs must show they have standing to bring their claims in

1 order to represent the putative class. *See Lierboe v. State Farm Mut. Auto. Ins. Co.*, 350 F.3d  
 2 1018, 1022 (9th Cir. 2003). Defendant contends that Plaintiffs do not have standing to assert any  
 3 of their claims because they have no documentary evidence to show that they purchased the  
 4 products at issue. Opp. at 15. Alternatively, Defendant argues that even if Plaintiffs could show  
 5 that they made those purchases, they neither relied upon nor were misled by the challenged labels,  
 6 and therefore suffered no injury at all. *Id.* at 7-12.<sup>3</sup> While Defendant couches these arguments as  
 7 challenges to whether Plaintiffs have satisfied Rule 23’s predominance and typicality  
 8 requirements, they ultimately amount to contentions that Plaintiffs were not injured within the  
 9 meaning of Article III and, as a result, lack standing. The Court therefore considers them as such.

10 **a. Legal Standard**

11 The Ninth Circuit, recognizing that the concepts of standing and class certification are  
 12 frequently (and easily) conflated, has emphasized that “[s]tanding is meant to ensure that the  
 13 injury a plaintiff suffers defines the scope of the controversy he or she is entitled to litigate, while  
 14 “[c]lass certification . . . is meant to ensure that named plaintiffs are adequate representatives of  
 15 the unnamed class.” *Melendres v. Arpaio*, 784 F.3d 1254, 1261 (9th Cir. 2015) (emphasis  
 16 omitted). In *Melendres*, the court held that “once the named plaintiff demonstrates her individual  
 17 standing to bring a claim, the standing inquiry is concluded, and the court proceeds to consider  
 18 whether the Rule 23(a) prerequisites for class certification have been met.” *Id.* at 1262-63  
 19 (citation omitted).

20 Controlling authority does not detail the evidentiary burden a putative class representative  
 21 must satisfy in establishing her standing. *See Dukes*, 564 U.S. at 351 (holding that Rule 23 “does  
 22 not set forth a mere pleading standard,” and noting that the “rigorous analysis” required under the  
 23 rule “will entail some overlap with the merits of the plaintiff’s underlying claim,” but not  
 24 specifying whether that standard applies to the jurisdictional question of standing in the class  
 25 certification context). Still, courts in this Circuit have concluded that putative class  
 26

27 <sup>3</sup> Defendant also contends that Plaintiffs do not have standing to seek injunctive relief. *See Opp.*  
 28 at 24-25. Because that is relevant only to the question of certification under Rule 23(b)(2), the  
 Court addresses it in that section below.

1 representatives “must demonstrate, not merely allege, that they have suffered an injury-in-fact to  
 2 establish Article III standing to bring the claims asserted on behalf of the [class].” *Evans v.*  
 3 *Linden Research, Inc.*, No. C 11-01078 DMR, 2012 WL 5877579, at \*6 (N.D. Cal. Nov. 20, 2012)  
 4 (citing *Nelsen v. King Cnty.*, 895 F.2d 1248, 1249-50 (9th Cir. 1990)); *see also Sethavanish v.*  
 5 *ZonePerfect Nutrition Co.*, No. 12-2907-SC, 2014 WL 580696, at \*3 (N.D. Cal. Feb. 13, 2014)  
 6 (same); *Torres v. Air to Ground Servs., Inc.*, 300 F.R.D. 386, 393 (C.D. Cal. 2014) (“At the class  
 7 certification stage . . . Plaintiff’s [standing] case must be able to withstand a ‘rigorous analysis  
 8 [that] will entail some overlap with the merits of the . . . underlying claim.’”) (quoting *Dukes*, 564  
 9 U.S. at 351). The Court finds this approach both persuasive and consistent with Rule 23’s  
 10 requirement that plaintiffs prove their entitlement to class certification by a preponderance of the  
 11 evidence, and accordingly will require Plaintiffs to make some evidentiary showing that they have  
 12 standing, rather than simply alleging as much.

13 To establish Article III standing, a plaintiff must show an injury-in-fact that is: (1) concrete  
 14 and particularized, as well as actual or imminent; (2) fairly traceable to the challenged action of  
 15 the defendant; and (3) redressable by a favorable ruling from the court. *Lujan v. Defenders of*  
 16 *Wildlife*, 504 U.S. 555, 560-61 (1992). “A plaintiff must demonstrate standing for each claim he  
 17 or she seeks to press and for each form of relief sought.” *Wash. Envtl. Council v. Bellon*, 732 F.3d  
 18 1131, 1139 (9th Cir. 2013). “In food-labeling cases such as this one, a plaintiff can satisfy the  
 19 Article III injury-in-fact requirement by showing that she either: (1) paid a price premium for a  
 20 mislabeled product; or (2) would not have purchased the product had he or she known about the  
 21 misbranding.” *Nguyen v. Medora Holdings, LLC*, No. 5:14-cv-00618-PSG, 2015 WL 4932836, at  
 22 \*5 (N.D. Cal. Aug. 18, 2015) (citations omitted); *see also Mazza v. Am. Honda Motor Co., Inc.*,  
 23 666 F.3d 581, 595 (9th Cir. 2012) (stating that, in class action alleging UCL, FAL, and CLRA  
 24 claims, “[t]o the extent that class members were relieved of their money by [Defendant’s]  
 25 deceptive conduct . . . they have suffered an ‘injury in fact’”) (citation omitted).

26 **b. There is sufficient evidence that Plaintiffs purchased the**  
 27 **products at issue.**

28 Defendant first contends that “Plaintiffs have failed to produce any evidence that they

1 actually purchased [Defendant’s] products.” Opp. at 15. If this were true, it would preclude any  
 2 argument that Plaintiffs have standing, as a food labeling plaintiff must prove, in part, that she  
 3 purchased the product. *See Nguyen*, 2015 WL 4932836, at \*5. Plaintiffs do not respond to  
 4 Defendant’s argument in the context of standing.

5 The Court rejects Defendant’s argument that Plaintiffs failed to produce evidence showing  
 6 that they bought Defendant’s products, since Plaintiffs cite the record to show that they did:

- 7 • With respect to products relevant to the Heart-Check Mark Class, Plaintiff Ang  
 8 testified that he purchased Thomas’ Plain Bagel Thins. *See Reply*, Ex. M (Deposition  
 9 of Alex Ang, or “Ang Depo.”) at 225:4-17.<sup>4</sup>
- 10 • With respect to products relevant to the Whole Grain Class, Plaintiffs both purchased  
 11 Sara Lee Classic 100% Whole Wheat Bread. *See Ang Depo.* at 172:9-14; *Reply*, Ex. J  
 12 (Deposition of Lynne Streit, or “Streit Depo.”) at 278:15-279:19. Plaintiff Ang also  
 13 purchased Sara Lee Soft & Smooth Whole Grain White Bread. *Ang Depo.* at 178:24-  
 14 179:4. And Plaintiff Streit also purchased Sara Lee 100% Whole Wheat Bread. *Streit*  
 15 *Depo.* at 283:18-284:13.
- 16 • With respect to products relevant to the Added Coloring Class, Plaintiff Ang purchased  
 17 Bimbo Original Toasted Bread. *See Ang Depo.* at 222:21-223:11.
- 18 • And, with respect to products relevant to the Whole Wheat Class, both Plaintiffs  
 19 purchased Sara Lee Classic 100% Whole Wheat Bread. *Ang Depo.* at 172:9-14; *Streit*  
 20 *Depo.* at 172:9-14. Plaintiff Streit also bought Sara Lee 100% Whole Wheat Bread.  
 21 *Streit Depo.* at 283:18-284:13.

22 In light of the above, at this stage of the litigation, the Court finds that Plaintiffs have proffered  
 23 sufficient evidence showing that they purchased the products at issue. The Court emphasizes that  
 24 this conclusion is only for purposes of class certification, and is not a comment on the strength of  
 25 Plaintiffs’ case on the merits.<sup>5</sup>

---

26  
 27 <sup>4</sup> In their motion, Plaintiffs attached rough transcripts of the deposition transcripts. They later  
 attached the final transcripts as exhibits to their reply brief. The Court cites to the latter.

28 <sup>5</sup> Defendant’s contention that Plaintiffs should produce receipts also goes to their argument that  
 the putative class is not ascertainable. But after the initial briefing in this case, the Ninth Circuit

c. **There is sufficient evidence that Plaintiffs read and relied upon the challenged labeling statements.**

Second, Defendant contends that Plaintiffs neither relied upon nor were misled by the challenged labeling statements. Again, the record indicates otherwise:

- With respect to products relevant to the Heart-Check Mark Class, Plaintiff Ang stated in his deposition that he “read and rel[ied] on” the “Heart Association” sticker affixed to the package of Thomas’ Plain Bagel Thins he bought. Ang Depo. at 225:8-226:5.
- With respect to products relevant to the Whole Grain Class, Plaintiff Ang stated that Defendant’s representation that the products were “whole grain” were a “substantial factor” in his “purchase decisions.” See Ang Depo. at 221:3-18; see also *id.* at 115:2-6 (“I believe if I was comparing products and one said whole grain and the other one didn’t I’d lean towards the whole grain.”). Plaintiff Streit, in her deposition, affirmed that she “read and rel[ied] on” the portion of the label that claimed the product was “an excellent source of whole grain.” See Streit Depo. at 285:12-286:8; see also *id.* at 286:9-11 (stating that the “whole grain” representation “affected greatly” her “purchase decision”).
- With respect to the products relevant to the Added Coloring Class, Plaintiff Ang stated that he “read and rel[ied]” on the label’s claim that the bread in the package was toasted—a belief that he says was bolstered by the bread’s resemblance to “stacks of toast.” See Ang Depo. at 223:17-226:20.
- And, with respect to the products relevant to the Whole Wheat Class, Plaintiff Ang stated that the representation that the products were “whole wheat” were a “substantial factor” in his “purchase decisions.” See Ang Depo. at 221:3-18; see *id.* at 65:2-6 (“Q: When you go shopping do you look for a label that says 100 percent whole wheat

---

confirmed that there is no stand-alone ascertainability requirement. See *True Health Chiropractic, Inc. v. McKesson Corp.*, 896 F.3d 923, 929 (9th Cir. 2018) (citing *Briseno v. ConAgra Foods, Inc.*, 844 F.3d 1121, 1133 (9th Cir. 2017)) (holding that, with respect to class certification, “there is no freestanding requirement above and beyond the requirements specifically articulated in Rule 23”). And, in any event, courts have held that a lack of receipts or records indicating who is in the class does not, on its own, preclude certification. See, e.g., *Lanovaz v. Twinings N. Am., Inc.*, No. C-12-02646-RMW, 2014 WL 1652338, at \*2 (N.D. Cal. Apr. 24, 2014) (citing cases).

1 bread or do you just look for wheat bread? A: If the two were side by side I'd probably  
 2 pick the 100 percent whole wheat bread.”). Plaintiff Streit, for her part, stated that  
 3 “[d]efinitely” read and relied upon the representation that the product was “100 percent  
 4 whole wheat.” Streit Depo. at 280:16-22.

5 At this stage of the litigation, Plaintiffs have proffered sufficient evidence to support their  
 6 contention that they relied upon the challenged labeling statements and thus have standing. Again,  
 7 the Court’s conclusion is only for purposes of class certification, and has no bearing on the  
 8 strength of Plaintiffs’ case on the merits (including the ultimate credibility of this testimony).

9 **d. Defendant’s arguments to the contrary are unpersuasive.**

10 Defendant asserts several arguments to the contrary, none of which are persuasive.

11 First, Defendant highlights various points in Plaintiff Streit’s deposition which it contends  
 12 weaken her claim of reliance on Defendant’s whole-grain representation—like her admission that  
 13 she does not know what a whole grain is, or that she does not know what constitutes an excellent  
 14 source of whole grain, or that she regularly buys other products that do not claim to be a source of  
 15 whole grains. *See Opp.* at 8. Setting aside the effect these statements may have on the  
 16 *persuasiveness* of Plaintiffs’ case, Plaintiff Streit has still made a legally sufficient threshold  
 17 showing that she was deceived by the label—at least for purposes of class certification.<sup>6</sup>

18 Second, Defendant argues that the record demonstrates that Plaintiff Ang would have  
 19 bought certain products even if the labeling claim had not been true. *See Opp.* at 9-10. But  
 20 whether he would have purchased the product anyway is not dispositive of the question of whether  
 21 he was deceived.

22 Third, Defendant contends that the fact that Plaintiff Streit did not have a soy allergy or  
 23 avoid buying products with soy in them precludes causation. Contrary to Defendant’s position,  
 24 however, Plaintiff’s Streit’s admission that she did not risk physical injury based on the label’s

25 \_\_\_\_\_  
 26 <sup>6</sup> The same reasoning negates Defendant’s argument regarding Plaintiff Ang’s purportedly  
 27 contradictory deposition testimony, and its claim that Plaintiff Streit ought to have known that  
 28 “‘soy flour’ is not the type of flour that could detract from the truthfulness of the ‘100% whole  
 wheat’ label.” *See Opp.* at 9. While those contentions may impact the ultimate persuasiveness of  
 Plaintiffs’ case, the Court at this stage looks only to whether Plaintiffs have proffered more than  
 just allegations regarding their standing to sue on behalf of the putative class.

1 alleged misrepresentation is irrelevant to standing under the UCL, FAL, or CLRA. *See*  
2 *Chacanaca v. Quaker Oats Co.*, 752 F. Supp. 2d 1111, 1125 (N.D. Cal. 2010); *see also In re*  
3 *Tobacco II Cases*, 46 Cal. 4th 298, 314 (2009) (economic injury sufficient under the UCL and  
4 FAL); *Kwikset Corp. v. Superior Court*, 51 Cal. 4th 310, 326-27 (2011) (same for CLRA).

5 Last, Defendant argues that Plaintiff Ang was not deceived by the American Heart  
6 Association Heart-Check Mark because he testified that if the American Heart Association tested  
7 and certified the product, it would not be misbranded. Opp. at 11-12. As Plaintiffs point out,  
8 Plaintiff Ang’s opinion about the underlying regulation that bars use of the Heart-Check Mark is  
9 irrelevant. What matters at this juncture is that he says he purchased the product at issue because  
10 its Heart-Check Mark label made him think that the product was healthier than other products.  
11 *See Ang Depo.* at 81:2-15.

12 Accordingly, the Court finds that Plaintiffs have demonstrated that they have standing for  
13 purposes of class certification.

## 14 2. Evidentiary Objections

15 The second threshold issue involves the parties’ various evidentiary objections. The only  
16 objections which the Court need consider are Defendant’s objections to the Rebuttal Declaration  
17 of Dr. Donald May, as the Court does not rely upon any other challenged evidence in resolving  
18 this motion. *See Dkt. No. 130-17* (rebuttal); *Dkt. No. 132* at 3-5 (Defendant’s objections).

19 Defendant first contends that the rebuttal is “new evidence” on reply and should be  
20 stricken. *See Provenz v. Miller*, 102 F.3d 1478, 1483 (9th Cir. 1996). But this document is used  
21 exclusively to respond to Defendant’s damages experts, which is a permissible use of expert  
22 evidence on reply. *See In re ConAgra Foods*, 90 F. Supp. 3d 919, 955 (C.D. Cal. 2014) (rebuttal  
23 evidence permissible on reply in support of class certification).

24 Defendant next contends that various statements in the rebuttal lack foundation because  
25 Dr. May does not explain the factual bases for several of his claims. *Dkt. No. 132* at 3-5. That is  
26 not an appropriate objection at this stage of the case. Under Federal Rule of Evidence 705,  
27 “[u]nless the court orders otherwise, an expert may state an opinion—and give the reasons for it—  
28 without first testifying to the underlying facts or data.”

1 Defendant also argues that the rebuttal contradicts Dr. May’s deposition testimony. Dkt.  
 2 No. 132 at 4-5. Even assuming that there are inconsistencies between his expert report and  
 3 deposition testimony, these are not reasons to exclude his opinions unless they so defeat their  
 4 reliability that they fail to meet the requirements of Federal Rule of Evidence 702. But Defendant  
 5 does not contend that is the case. These issues are relevant to the plausibility of the damages  
 6 models that Dr. May proposes, and the Court will consider them in that context.

7 Finally, Defendant argues that the rebuttal is inadmissible because Dr. May failed to run  
 8 his proposed damages model in advance of class certification. At class certification, however, a  
 9 plaintiff’s damages expert need only propose a plausible model for calculating damages. *In re*  
 10 *High-Tech Employee Antitrust Litig.*, 289 F.R.D. 555, 567 (N.D. Cal. 2013).

11 Defendant’s objections are therefore overruled.

### 12 3. Rule 23(a)

13 Having resolved these threshold issues, the Court next considers whether Plaintiffs have  
 14 satisfied the requirements of Rule 23(a).

#### 15 a. Numerosity

16 Rule 23(a)(1) requires that the putative class be “so numerous that joinder of all members  
 17 is impracticable.” Plaintiffs contend that the numerosity requirement is satisfied because  
 18 “Defendant sold many thousands of units of the products at issue.” *See* Mot. at 10. Defendant  
 19 disagrees, arguing in a footnote that Plaintiffs have failed to present evidence supporting their  
 20 numerosity assertion. Opp. at 7 n.4. Plaintiffs do not mention numerosity in their reply brief.

21 “[C]ourts have routinely found the numerosity requirement satisfied when the class  
 22 comprises 40 or more members.” *Villalpando v. Exel Direct Inc.*, 303 F.R.D. 588, 605-06 (N.D.  
 23 Cal. 2014) (citation omitted). Although Plaintiffs do not provide a clear estimate of how many  
 24 proposed class members there are, Defendant’s expert conducted a survey of more than 600  
 25 putative class members. Dkt. No. 121-11 (Declaration of Dr. Kent D. Van Liere) ¶¶ 9, 17.  
 26 Moreover, the fact that *Defendant* did not maintain any records showing ultimate retail sales  
 27 should not serve as a basis to preclude a showing of numerosity. *See* Opp. at 6 (“[T]here are no  
 28 records in this case that could identify retail purchasers of [Defendant’s] products.”).

1           “The test of typicality is whether other members have the same or similar injury, whether  
2 the action is based on conduct which is not unique to the named plaintiffs, and whether other class  
3 members have been injured by the same course of conduct.” *Hanon v. Dataproducts Corp.*, 976  
4 F.2d 497, 508 (9th Cir. 1992) (internal quotation marks omitted). Under the “permissive  
5 standards” of Rule 23(a)(3), the claims need only be “reasonably co-extensive with those of absent  
6 class members,” rather than “substantially identical.” *Hanlon v. Chrysler Corp.*, 150 F.3d 1011,  
7 1020 (9th Cir. 1998). In other words, “[t]ypicality is satisfied when each class member’s claim  
8 arises from the same course of events, and each class member makes similar legal arguments to  
9 prove the [defendant’s] liability.” *Hadley v. Kellogg Sales Co.*, No. 16-CV-04955-LHK, --- F.  
10 Supp. 3d ---, 2018 WL 3954587, at \*23 (N.D. Cal. Aug. 17, 2018) (quoting *Rodriguez v. Hayes*,  
11 591 F.3d 1105, 1122 (9th Cir. 2010)) (internal quotation marks omitted).

12           Here, Plaintiffs’ claims are “reasonably co-extensive” with those of the proposed class  
13 because they are alleging the same injury based on their purchase of similar products. While  
14 Plaintiffs may not have purchased all of the challenged products, the class allegations all aver  
15 injury based on either Defendant’s (1) application of the American Heart Association’s “Heart-  
16 Check Mark” without acknowledging that it is a paid endorsement; (2) labeling products as a  
17 “good” or “excellent source of whole grain”; (3) labeling products as bread, despite the added  
18 coloring; or (4) labeling products as “100% Whole Wheat,” despite their use of non-whole wheat  
19 flour. For typicality purposes, this is sufficient, even though Plaintiffs did not purchase all (or  
20 even most) of the challenged products. *See, e.g., Todd v. Tempur-Sealy Int’l, Inc.*, No. 13-cv-  
21 04983-JST, 2016 WL 5746364, at \*5 (N.D. Cal. Sept. 30, 2016) (“Plaintiffs’ theory of the case is  
22 that Defendants falsely represented that all of their products are free of harmful chemicals when in  
23 fact, none of them are. Slight differences between the mattresses purchased by class members are  
24 not disqualifying, or even relevant.”); *Lilly v. Jamba Juice Co.*, 308 F.R.D. 231, 240 (N.D. Cal.  
25 2014) (“Named Plaintiffs Lilly and Cox clearly have a similar alleged injury as the rest of the  
26 proposed class, since they purchased products that are the same as, or very similar to, the products  
27 challenged by the rest of the proposed class.”); *Ogden v. Bumble Bee Foods, LLC*, 292 F.R.D.  
28 620, 626 (N.D. Cal. 2013) (finding that the plaintiff established typicality “as to products with

1 similar or identical claims about Omega-3 content, as those labels may have misled class members  
2 in the same way that they allegedly misled [the plaintiff] even if the products are not the same”).

3 **d. Adequacy**

4 Rule 23(a)(4) requires that the “representative parties will fairly and adequately represent  
5 the interests of the class.”

6 On the question of adequacy, the Court must address two legal questions: (1) whether the  
7 named plaintiffs and their counsel have any conflicts of interest with other putative class members,  
8 and (2) whether the named plaintiffs and their counsel will prosecute the action vigorously on  
9 behalf of the proposed class. *See In re Mego Fin. Corp. Sec. Litig.*, 213 F.3d 454, 462 (9th Cir.  
10 2000). This inquiry “tend[s] to merge” with the commonality and typicality criteria. *Gen. Tel.  
11 Co. of Sw. v. Falcon*, 457 U.S. 147, 158 n.13 (1982). In part, these requirements determine  
12 whether “the named plaintiff’s claim and the class claims are so interrelated that the interests of  
13 the class members will be fairly and adequately protected in their absence.” *Id.*

14 The Court is unaware of any conflicts among Plaintiffs and proposed class members, and  
15 finds that Plaintiffs have, to date, vigorously prosecuted the action on behalf of the alleged classes.  
16 Moreover, the Court has found that Plaintiffs satisfy the commonality and typicality requirements,  
17 and Defendant does not meaningfully object to named Plaintiffs’ or counsel’s adequacy per Rule  
18 23(a)(4). The Court is therefore satisfied that Plaintiffs can adequately represent the various  
19 classes as pled.

20 **4. Rule 23(b)(2)**

21 In addition to satisfying the requirements of Rule 23(a), Plaintiffs seeking class  
22 certification must meet the requirements of one of the prongs of Rule 23(b). In this case, Plaintiffs  
23 seek certification under Rule 23(b)(2) and (b)(3). With respect to the question of certification  
24 under Rule 23(b)(2), the Court begins with the threshold question of standing.

25 **a. Standing**

26 In both its opposition to the original motion and its supplemental briefing, Defendant  
27 contends that Plaintiffs lack standing to seek injunctive relief under Rule 23(b)(2). *See Opp.* at 25;  
28 Dkt. No. 181 at 2-5. The Court disagrees.

1 After Plaintiffs filed their motion, the Ninth Circuit clarified the standard for determining  
2 when a plaintiff has standing to seek injunctive relief in a mislabeling class action. It held that “a  
3 previously deceived consumer may have standing to seek an injunction against false advertising or  
4 labeling, even though the consumer now knows or suspects that the advertising was false at the  
5 time of the original purchase, because the consumer may suffer an actual and imminent, not  
6 conjectural or hypothetical threat of future harm.” *Davidson v. Kimberly-Clark Corp.*, 889 F.3d  
7 956, 969 (9th Cir. 2018) (citation and internal quotation marks omitted). But the court cautioned  
8 that mere knowledge of a label’s falsity in the past “does not equate to knowledge that it will  
9 remain false in the future.” *Id.* Instead, a plaintiff seeking injunctive relief may show, for  
10 example, that “she will be unable to rely on the product’s advertising or labeling in the future, and  
11 so will not purchase the product although she would like to.” *Id.* “In other cases, the threat of  
12 future harm may be the consumer’s plausible allegations that she might purchase the product in  
13 the future, despite the fact it was once marred by false advertising or labeling, as she may  
14 reasonably, but incorrectly, assume the product was improved.” *Id.* Importantly, the Ninth  
15 Circuit’s conclusion is narrower than a blanket conclusion that plaintiffs seeking injunctive relief  
16 in mislabeling class actions always have standing. The principle set forth in *Davidson* is more  
17 accurately cast as the court’s “not [being] persuaded that injunctive relief is *never* available for a  
18 consumer who learns after purchasing a product that the label is false.” *Id.* (quoting *Duran v.*  
19 *Creek*, No. 3:15-cv-05497-LB, 2016 WL 1191685, at \*7 (N.D. Cal. Mar. 28, 2016)) (original  
20 emphasis).

21 In this case, Plaintiffs have demonstrated that they have standing to seek injunctive relief.  
22 Plaintiff Ang testified that, but for the alleged mislabeling, he would buy the products in the  
23 future. *See* Ang Depo. at 222:1-4 (“Q: How do you feel about resuming buying [Defendant’s]  
24 products in the future? A: You know, I like the way they taste. I’d buy them if they were labeled  
25 properly.”). Plaintiff Streit, for her part, stated that she would buy Defendant’s products in the  
26 future “if the labels were corrected and [one] hundred percent truthful.” Streit Depo. at 289:25-  
27  
28

1 290:3. Under *Davidson*, this is a sufficient basis to find standing under Rule 23(b)(2).<sup>8</sup>

2 Defendant’s arguments to the contrary are not persuasive. Most pertinently, it contends  
 3 that notwithstanding *Davidson*, “Plaintiffs lack standing to pursue injunctive relief against  
 4 products as to which the allegedly false labeling has already been removed.” Dkt. No. 181 at 3.  
 5 But as Plaintiffs point out, Defendant proffers no “irrefutabl[e]” evidence that the challenged  
 6 conduct has been “total[ly]” ceased, as would be required to moot claims for injunctive relief. *See*  
 7 *Polo Fashions, Inc. v. Dick Bruhn, Inc.*, 793 F.2d 1132, 1135 (9th Cir. 1986). Instead, Defendant  
 8 states only that “*many* of the challenged statements have already been removed from the labels of  
 9 . . . [Defendant’s] products,” Opp. at 24 (emphasis added), and provides no update in its  
 10 supplemental briefing. That is an insufficient basis for the Court to find that Plaintiffs’ lack  
 11 standing. Accordingly, the Court turns to whether Plaintiffs are entitled to certification under Rule  
 12 23(b)(2).

13 **b. Discussion**

14 “Rule 23(b)(2) applies only when a single injunction . . . would provide relief to each  
 15 member of the class.” *Dukes*, 564 U.S. at 360. The “key” to finding a class under Rule 23(b)(2)  
 16 “is the indivisible nature of the injunctive or declaratory remedy warranted—the notion that the  
 17 conduct is such that it can be enjoined . . . only as to *all* of the class members or as to *none* of  
 18 them.” *Id.* (citation and internal quotation marks omitted) (emphasis added). Rule 23(b)(2) “does  
 19 not authorize class certification when each individual class member would be entitled to a *different*  
 20 injunction . . . against the defendant,” or “to an individualized award of monetary damages.” *Id.* at  
 21 360-61 (original emphasis).

22 Initially, Plaintiffs purported to seek (1) “declaratory relief that Defendant’s labeling  
 23 practices at issue are illegal”; (2) “injunctive relief barring Defendant from engaging in these  
 24 labeling practices in the future”; and (3) “all available incidental monetary relief to which class  
 25 members are entitled.” Mot. at 23. In reply, however, they appear to abandon their claim to

26 \_\_\_\_\_  
 27 <sup>8</sup> The Court acknowledges that Plaintiffs did not plead these facts in the SAC. Given the unique  
 28 posture of this case, however—namely, that *Davidson* was decided in the middle of this  
 litigation—the Court finds that Plaintiffs’ evidentiary showing is an adequate basis on which to  
 find standing.

1 anything other than injunctive relief under Rule 23(b)(2), clarifying that “they do not seek a (b)(2)  
2 injunction class so that they can recover monetary relief,” but rather, “to enjoin Defendant from  
3 continuing to mislabel the subject products.” Reply at 12. Defendant contends that “plaintiffs’  
4 prayer for injunctive relief is clearly secondary to their damages claims,” rendering certification  
5 under Rule 23(b)(2) inappropriate. Opp. at 24.

6 The Court disagrees with Defendant’s reading of the caselaw on which it relies for this  
7 point. It cites to *Algarin v. Maybelline, LLC*, a case from the Southern District of California, for  
8 the proposition that “[c]lass certification under Rule 23(b)(2) is appropriate only where the  
9 primary relief sought is declaratory or injunctive.” 300 F.R.D. 444, 458 (S.D. Cal. 2014) (quoting  
10 *Ellis v. Costco Wholesale Corp.*, 657 F.3d 970, 986 (9th Cir. 2011)). Based on that statement,  
11 Defendant appears to argue that Plaintiffs’ attempt to certify a damages class under Rule 23(b)(3)  
12 bars certification under Rule 23(b)(2). The Court, however, reads *Algarin* and *Ellis* to preclude  
13 Rule 23(b)(2) certification where the primary relief sought *under Rule 23(b)(2)* is monetary—not  
14 where a plaintiff seeks certification under both Rule 23(b)(2) and (b)(3). *Cf. Ellis*, 657 F.3d at 986  
15 (noting that “in Rule 23(b)(2) cases, monetary damage requests are generally allowable only if  
16 they are merely incidental to the litigation”) (citation and internal quotation marks omitted); *see*  
17 *also In re ConAgra Foods, Inc.*, 302 F.R.D. 537, 573 (C.D. Cal. 2014) (“Ninth Circuit precedent  
18 indicates that the court can separately certify an injunctive relief class and if appropriate, also  
19 certify a Rule 23(b)(3) damages class.”)

20 The only remaining question, then, is whether “a single injunction . . . would provide relief  
21 to each member of the class.” *Dukes*, 564 U.S. at 360. Based on the alleged mislabeling, the  
22 Court finds that it would, and grants certification of all four classes under Rule 23(b)(2). The  
23 Court remains mindful, however, that a showing of irrefutable and total cessation of the  
24 challenged conduct prior to a final judgment in this litigation may be grounds for a decertification  
25 motion. *See Fed. R. Civ. P. 23(c)(1)(C)* (“An order that grants or denies class certification may be  
26 altered or amended before final judgment.”).

## 27 5. Rule 23(b)(3)

28 As indicated above, Plaintiffs also seek certification under Rule 23(b)(3), which requires

1 Plaintiffs to show predominance and superiority. As detailed below, because the Court finds that  
 2 Plaintiffs have failed to meet the predominance requirement, it need not reach the superiority  
 3 analysis.<sup>9</sup>

4 **a. Legal Standard**

5 “The predominance inquiry tests whether proposed classes are sufficiently cohesive to  
 6 warrant adjudication by representation.” *Tyson Foods, Inc. v. Bouaphakeo*, 136 S. Ct. 1036, 1045  
 7 (2016) (internal quotation marks omitted). The Supreme Court has defined an individual question  
 8 as “one where members of a proposed class will need to present evidence that varies from member  
 9 to member, while a common question is one where the same evidence will suffice for each  
 10 member to make a prima facie showing [or] the issue is susceptible to generalized, class-wide  
 11 proof.” *Id.* (citation and internal quotation marks omitted) (original brackets). This “inquiry asks  
 12 whether the common, aggregation-enabling, issues in the case are more prevalent or important  
 13 than the non-common, aggregation-defeating, individual issues.” *Id.* (citation and internal  
 14 quotation marks omitted).

15 With respect to the monetary relief sought by a putative class, predominance requires that  
 16 “damages are capable of measurement on a classwide basis, in the sense that the whole class  
 17 suffered damages traceable to the same injurious course of conduct underlying the plaintiffs’ legal  
 18 theory.” *Just Film, Inc. v. Buono*, 847 F.3d 1108, 1120 (9th Cir. 2017) (quoting *Comcast Corp. v.*  
 19 *Behrend*, 569 U.S. 27, 34 (2013)) (internal quotation marks omitted); *see also Bruton v. Gerber*  
 20 *Prods. Co.*, No. 12-CV-02412-LHK, 2018 WL 1009257, at \*8-12 (N.D. Cal. Feb. 13, 2018)  
 21 (applying *Comcast’s* damages predominance requirement to proposed restitution calculation

22 \_\_\_\_\_  
 23 <sup>9</sup> When the parties originally briefed this motion, the Ninth Circuit had not issued *Briseno* or *True*  
 24 *Health*, which this Court reads to confirm that there is no implied ascertainability requirement for  
 25 class certification. Previously, courts applying this standard incorporated an administrative  
 26 feasibility requirement, which rendered certification “inappropriate where ascertaining class  
 27 membership would require unmanageable individualized inquiry.” *Xavier v. Philip Morris USA,*  
 28 *Inc.*, 787 F. Supp. 2d 1075, 1089 (N.D. Cal. 2011). In its supplemental brief, Defendant contends  
 that *Briseno* does not wholly foreclose the Court from considering administrative feasibility. *See*  
 Dkt. No. 178 at 9-10. That is true, insofar as the Court is required “to consider the likely  
 difficulties in managing a class action” as part of the Rule 23(b)(3) analysis. *See Briseno*, 844  
 F.3d at 1126 (quoting Fed. R. Civ. P. 23(b)(3)(D)). Since the Court finds that Plaintiffs have  
 failed to demonstrate predominance, however, it need not consider manageability (*i.e.*, the  
 administrative feasibility of identifying proposed class members).

1 methods); *Jones v. ConAgra Foods, Inc.*, No. C 12-01633 CRB, 2014 WL 2702726, at \*19-23  
 2 (N.D. Cal. June 13, 2014) (same). As such, “a model purporting to serve as evidence of damages  
 3 in [a] class action must measure only those damages attributable” to the relevant theory of  
 4 liability. *Comcast*, 569 U.S. at 35. While a proffered model “need not be exact” at the class  
 5 certification stage, it “must be consistent with [the plaintiff’s] liability case.” *Id.* (citations and  
 6 internal quotation marks omitted); *see also Cal. v. Infineon Techs. AG*, No. C 06-4333 PJH, 2008  
 7 WL 4155665, at \*9 (N.D. Cal. Sept. 5, 2008) (stating that at class certification stage, court’s role  
 8 is to “discern only whether plaintiffs have advanced a *plausible* methodology to demonstrate that  
 9 . . . injury can be proven on a class-wide basis”) (emphasis added). Moreover, while  
 10 predominance is not shown where “[q]uestions of individual damage calculations . . . inevitably  
 11 overwhelm questions common to the class,” *Comcast*, 569 U.S. at 34, the “presence of  
 12 individualized damages” on its own is insufficient to defeat class certification, *Just Film*, 847  
 13 F.3d at 1120 (quoting *Leyva v. Medline Indus. Inc.*, 716 F.3d 510, 514 (9th Cir. 2013)).

14 The Supreme Court has made clear that Rule 23(b)(3)’s predominance requirement is  
 15 “even more demanding” than the commonality requirement of Rule 23(a). *See Comcast*, 569 U.S.  
 16 at 34 (citing *Amchem Prods., Inc. v. Windsor*, 521 U.S. 591, 623-24 (1997)). Accordingly, the  
 17 Court will apply this rigorous standard in determining whether Plaintiffs have shown that  
 18 restitution owed under the UCL, the FAL, and the CLRA is “capable of measurement on a  
 19 classwide basis.” *See Just Film*, 847 F.3d at 1120; *see also Colgan v. Leatherman Tool Grp., Inc.*,  
 20 135 Cal. App. 4th 663, 694 (2006) (authorizing “trial court[s] to grant restitution to private  
 21 litigants asserting claims under those statutes”). “The difference between what the plaintiff paid  
 22 and the value of what the plaintiff received is a proper measure of restitution.” *In re Vioxx Class*  
 23 *Cases*, 180 Cal. App. 4th 116, 131 (2009) (analyzing claims under the UCL, the FAL, and the  
 24 CLRA). In addition to restitution, the CLRA contains a damages provision “to compensate for  
 25 actual loss.” *Colgan*, 135 Cal. App. 4th at 696.

#### 26 **b. Discussion**

27 Plaintiffs propose several models by which to calculate their economic injury, all of which  
 28 they contend satisfy the predominance requirements of Rule 23(b)(3). The Court considers each

1 in turn.

2 **i. Full Refund Model**

3 Plaintiffs first contend that “monetary relief will be relatively easy to calculate because  
4 class members are entitled to the full refund of their purchase price.” Mot. at 19 (“the Full Refund  
5 Model”). The Court disagrees. In this Circuit, courts have consistently declined to apply the full-  
6 refund method of calculating restitution where a plaintiff cannot show that the product she  
7 purchased or consumed was worthless. *See, e.g., Brazil v. Dole Packaged Foods, LLC*, 660 F.  
8 App’x 531, 534 (9th Cir. 2016) (noting that under these statutes, “a plaintiff cannot be awarded a  
9 full refund unless the product she purchased was worthless”) (citing *In re Tobacco Cases II*, 240  
10 Cal. App. 4th 779, 795 (2015))<sup>10</sup>; *Khasin v. R.C. Bigelow, Inc.*, No. 12-cv-02204-WHO, 2016 WL  
11 1213767, at \*3 (N.D. Cal. Mar. 29, 2016) (noting that this method of calculation “has been  
12 repeatedly rejected in this district” and was rendered implausible in that case by its “assum[ption]  
13 that consumers gained no benefit in the form of enjoyment, nutrition, caffeine intake, or hydration  
14 from consuming the teas” at issue).

15 Plaintiffs’ only response is to cite out-of-Circuit law for their contention that “[a]s a matter  
16 of law, food products that violate [21 U.S.C. § 331] are worth zero.” Reply at 11 (citing *U.S. v.*  
17 *Gonzalez-Alvarez*, 277 F.3d 73, 78 (1st Cir. 2002)). Notwithstanding the fact that the Ninth  
18 Circuit has not adopted this stance with respect to allegedly mislabeled food, *Gonzalez-Alvarez*  
19 dealt with the value of adulterated milk in the context of “assessing loss” under the U.S.  
20 Sentencing Guidelines, not a restitution determination. *See* 277 F.3d at 78. Further, Plaintiffs’  
21 argument that the cases cited by Defendant “*presumed* that the products at issue had some positive  
22 value,” Reply at 11 (emphasis added), is unpersuasive, because it is well-settled that a full refund  
23 is inappropriate where it would give class members “the full benefit of the bargain *and* the  
24 monetary value of the defective” product, *see Huu Nguyen v. Nissan N. Am., Inc.*, No. 16-CV-  
25 05591-LHK, 2018 WL 1831857, at \*5 (N.D. Cal. Apr. 9, 2018) (original emphasis).

26 Accordingly, the Court finds that the Full Refund Model does not satisfy the predominance

27 \_\_\_\_\_  
28 <sup>10</sup> While *Brazil* is unpublished and thus non-binding, the Court finds it to be on-point, persuasive  
authority.

1 requirement of Rule 23(b)(3) as set forth in *Comcast*, because Plaintiffs have not shown that it  
 2 “measure[s] only those damages attributable” to their theory of liability. *See* 569 U.S. at 35.

3 **ii. Restitutionary Disgorgement Model**

4 Alternatively, Plaintiffs contend they are “entitled to restitutionary disgorgement of the  
 5 revenues received as a result of the sale of the products at issue to the class members.” Mot. at 20  
 6 (“the Restitutionary Disgorgement Model”). Plaintiffs reason that even if they are not entitled to a  
 7 full refund, the Court can still use this method to “establish a ‘floor’ for the relief to which they are  
 8 entitled,” as “class members would actually receive less than the amount of their loss.” *Id.*  
 9 Defendant counters that, as with the Full Refund Model, Plaintiffs’ proposed Restitutionary  
 10 Disgorgement Model “fails to take into account any value that the plaintiffs received from their  
 11 consumption of [Defendant’s] products.” Opp. at 20. The Court agrees with Defendant.

12 Plaintiffs propose a calculation in which class members receive the revenues earned by  
 13 Defendant for the offending products. *See* Mot. at 20; Dkt. No. 104-5 (Declaration of Dr. Donald  
 14 M. May, or “May Decl.”) ¶¶ 21-24 (describing how to calculate restitutionary disgorgement  
 15 without accounting for value received by class members). As a threshold matter, Plaintiffs’  
 16 proposed method of measuring restitution looks to Defendant’s *gains*, rather than the putative  
 17 class members’ *loss*, and so is better described as *nonrestitutionary* disgorgement. *See Hadley*,  
 18 2018 WL 3954587, at \*19 (quoting *Tobacco II*, 240 Cal. App. 4th at 800). But “it is well  
 19 established that nonrestitutionary disgorgement . . . is unavailable in a class action under the FAL,  
 20 CLRA, and UCL.” *Id.* (citations and internal quotation marks omitted). As a matter of law, then,  
 21 Plaintiffs’ proposed calculation is improper.

22 Even if that were not true, Defendant correctly argues that the Restitutionary Disgorgement  
 23 Model again assumes that the putative class members receive zero value from consumption of  
 24 those products. As with the Full Refund Model, this is not an appropriate method of calculating  
 25 restitution. *See Ogden v. Bumble Bee Foods, LLC*, No. 5:12-CV-01828-LHK, 2014 WL 27527, at  
 26 \*13 (N.D. Cal. Jan. 2, 2014) (rejecting proposed methodology for calculating disgorgement where  
 27 plaintiff conceded that products at issue had “*some* value to [her] apart from the statement on the  
 28 products’ labels,” but failed to account for that value); *Brazil v. Dole Packaged Foods, LLC*, No.

1 12-CV-01831-LHK, 2014 WL 2466559, at \*15 n.6 (N.D. Cal. May 30, 2014) (rejecting proposed  
 2 disgorgement model for calculating damages “for the same reasons as the Full Refund Model”),  
 3 *decertified in part*, 2014 WL 5794873 (N.D. Cal. Nov. 5, 2014); *Werdebaugh v. Blue Diamond*  
 4 *Growers*, No. 12-CV-2724-LHK, 2014 WL 2191901, at \*22 n.9 (N.D. Cal. May 23, 2014) (same),  
 5 *decertified*, 2014 WL 7148923 (N.D. Cal. Dec. 15, 2014).

6 Accordingly, the Court finds that the Restitutionary Disgorgement Model does not satisfy  
 7 the requirements of Rule 23(b)(3) as set forth in *Comcast*.

### 8 **iii. Product Labeling Characteristics Model**

9 Plaintiffs’ third proposed alternative focuses on the “value of product labeling  
 10 characteristics,” and looks to the “differences in prices and sales of products with and without the  
 11 labeling claims at issue.” Mot. at 20 (“the Product Labeling Characteristics Model”).

12 The Court begins by noting that Plaintiffs do little in their brief to develop the damages  
 13 analysis of their expert, Dr. Donald May, and instead simply refer the Court to large swaths of his  
 14 declaration. *See* Mot. at 20 (citing May Decl. ¶¶ 25-55); Reply at 11 (summarily citing to Dr.  
 15 May’s rebuttal declaration with no pin cites). As described by Dr. May, this methodology assigns  
 16 a dollar value to the “false labeling claim,” and calculates restitution accordingly. *See* May Decl.  
 17 ¶ 26. Using an “econometric or regression analysis,” Plaintiffs propose to “isolate the  
 18 consequence of the alleged misrepresentation by controlling for all other factors that may affect  
 19 the price differentials, prices and/or volume sold of the challenged products.” *Id.* ¶ 35. In this  
 20 analysis, “the supposition is that individual food products are composed of various attributes,”  
 21 each of which can be assigned a price. *Id.* ¶ 37. “Simply put, controlling for other attributes in the  
 22 regression analysis (e.g., brand, package size, seasonality of prices, year-to-year fluctuations in  
 23 prices attributed to economic conditions), we may ascertain the impact of the labeling claim on  
 24 prices of particular food products.” *Id.* While Dr. May references the need to control for certain  
 25 variables in the restitution calculation, *see id.* ¶¶ 44-45 48, he does not plausibly explain how he  
 26 will be able to do so. In his rebuttal declaration, he states only his understanding that challenges  
 27 to the analysis are more properly taken up once he has the appropriate data (if the class is  
 28 certified). *See* Dkt. No. 130-17 (Rebuttal Declaration of Dr. Donald May, or “May Rebuttal”) ¶¶

1 13, 20, 21.

2 The Court finds the analysis in *Bruton* instructive. See 2018 WL 1009257. There, the  
3 court found that a regression model proposed by the plaintiff's expert did "not satisfy *Comcast*  
4 because . . . [the plaintiff did] not explain how the proposed Regression Model will account for  
5 independent variables that might affect the products' prices or sales, such as advertising, brand  
6 recognition or loyalty, the prices of competing products, regional differences, consumers' income,  
7 and seasonality." *Id.* at \*10. There too, the expert provided a "partial list of the variables that  
8 might distort the proposed Regression Model's analysis," but then "merely state[d] that  
9 subsequent analysis will be 'controlling for these factors' and decline[d] to elaborate further." *Id.*  
10 at \*11. Acknowledging that "absolute precision is not required at the class certification stage," the  
11 court nonetheless concluded that the plaintiff had "failed to provide a meaningful explanation as to  
12 how the variables will be addressed." *Id.* at \*12 ("That does not satisfy *Comcast*—real  
13 explanation is necessary.").

14 The same problems with the proposed model in *Bruton* preclude Dr. May's Product  
15 Labeling Characteristics Model from satisfying *Comcast*. Dr. May states that "from an economic  
16 standpoint," he does not "need to identify 'all' factors that might influence prices [and/or] volume  
17 sold in my analysis." Rebuttal Decl. ¶ 21. Rather, he "simply need[s] to control for factors that  
18 are significantly correlated with the labeling claim and might also influence price [and/or] volume  
19 sold depending on which is the dependent variable." *Id.* He further states that "it is unnecessary  
20 and unreasonable to include all such theoretical factors identified" in these circumstances. *Id.* But  
21 that misses the point. The Court is less concerned with whether Plaintiffs have attempted to  
22 account for every factor that might affect the restitution analysis, and more concerned with  
23 whether Plaintiffs have shown *how* they can control for other factors (*e.g.*, "brand, package size,  
24 seasonality of prices, year-to-year fluctuations in prices attributed to economic conditions") that  
25 may affect the value derived from the products—and which may be based on something other than  
26 Defendant's alleged misbranding. See May Decl. ¶ 37. As did the expert in *Bruton*, Dr. May has  
27 provided a partial list of variables that will need to be controlled for, and attempts to postpone his  
28 explanation of how he will account for them until after class certification. See 2018 WL 1009257,

1 at \*11. But the Rule 23(b)(3) analysis is more rigorous than the Rule 23(a) analysis, *see Comcast*,  
 2 569 U.S. at 34, and the Rule does not permit the Court to wait until after certification to assess  
 3 whether Plaintiffs' Product Labeling Characteristics Model is capable of measuring economic  
 4 injury attributable to the alleged misbranding on a classwide basis.

5 Accordingly, the Court finds that the Product Labeling Characteristics Model does not  
 6 satisfy the requirements of Rule 23(b)(3) as set forth in *Comcast*.

#### 7 **iv. Incremental Sales Revenues Model**

8 Plaintiffs' fourth proposed alternative focuses on "incremental sales revenues," and looks  
 9 to the "differences in prices and sales of the products at issue *during* the time in which they have  
 10 been labeled with the misrepresentations at issue and . . . *before* the misrepresentations were  
 11 placed on the labels, or *after* they were removed." Mot. at 20 (emphasis added) ("the Incremental  
 12 Sales Revenues Model").

13 This approach uses the same regression model as the Product Labeling Characteristics  
 14 Model, but uses "data on units sold before and after the labeling claim . . . to directly estimate  
 15 incremental sales associated with each particular claim." May Decl. ¶ 52. Plaintiffs intend to  
 16 gather "[h]istorical data on total sales before and after a particular labeling claim[.]" and then use  
 17 that data "to determine the trend in sales for the particular products of interest over a sufficient  
 18 time period that includes periods when the labeling claims existed and did not exist." *Id.* ¶ 53. So,  
 19 for example, "if the regression equation shows that the trend in sales has increased by 10% as a  
 20 result of the particular labeling claim and total sales of that product are \$100 million[.], then total  
 21 damages under the incremental sales approach would be \$10 million." *Id.* ¶ 56.

22 As Defendant points out, this proposed model also fails to sufficiently "control for other  
 23 changes that [Defendant] may have made to its labels during the class period and does not account  
 24 for whether such changes had any impact on price." Opp. at 22. That alone is fatal to this model's  
 25 ability to measure economic injury on a classwide basis. Even if that were not an issue, however,  
 26 Defendant contends that Plaintiffs have failed to account for the fact that "there are dozens of  
 27 products at issue here," and that "most of the products' labels changed during the class period  
 28 while others remained the same," resulting in an inability to "reliably determine which labels were

1 present in supermarkets in California at any given time.” Dkt. No. 178 at 7. This is analogous to  
 2 the situation in *Bruton*, where the court rejected a proposed regression model that “lack[ed] a  
 3 reliable means for comparing the products with and without the challenged label statements.”  
 4 2018 WL 1009257, at \*10. This was especially true given the number of products and label  
 5 statements at issue, as well as the “multiple label iterations”: “some labels contained the  
 6 challenged statements, some did not, and some had only one or different statements in different  
 7 locations than on other variations of the same product label.” *Id.* Another “more important flaw”  
 8 was the plaintiff’s inability to “determine precisely when consumers were buying [the products at  
 9 issue] *with* the challenged label statements, and . . . *without* the challenged label statements.” *Id.*  
 10 at \*11 (original emphasis). This left “no way to determine what label was on the product a  
 11 consumer purchased in the retail transactions that are the foundation of the proposed Regression  
 12 Model’s analysis.” *Id.* “Given the absence of a reliable means to compare products with and  
 13 without the challenged labeling,” the court concluded that the model failed to satisfy *Comcast*. *Id.*

14 So too here. In Dr. May’s initial declaration, he makes no mention of how Plaintiffs might  
 15 account for the problem of determining which labels were on which products at which time. His  
 16 rebuttal does not add much: he acknowledges the issue, but only offers the conclusory assertion  
 17 that “it would be possible to perform a hedonic regression with similar products and thus identify  
 18 the value of the labeling claims independent of the labeling change dates.” May Rebuttal ¶ 26. As  
 19 with his Product Labeling Characteristics Model, he fails to proffer even a broad explanation as to  
 20 *how* to do so in a manner that isolates any economic injury caused by the alleged misbranding—  
 21 and as with his Product Labeling Characteristics Model, this is insufficient.

22 Accordingly, the Court finds that the Incremental Sales Revenues Model does not satisfy  
 23 the requirements of Rule 23(b)(3) as set forth in *Comcast*.

24 **v. Statutory Damages Model (CLRA Claims Only)**

25 Plaintiffs’ next proposed model applies only to their claims under the CLRA: they propose  
 26 that “if Defendant is found liable for violations of the CLRA, at a minimum, the classes would be  
 27 entitled to [the statutory minimum of] \$1,000 for each violation.” Mot. at 21 (citation omitted)  
 28 (“the Statutory Damages Model”). Defendant contends, however, that such an award would

1 require the Court to engage in individualized questions of proof. Opp. at 23.

2 In the class action context, the CLRA provides for “[a]ctual damages” of at least \$1,000  
3 per violation. Cal. Civ. Code § 1780(a)(1). It does not, however, “provide for an automatic award  
4 of \$1,000 per individual class member.” *Jones*, 2014 WL 2702726, at \*23. Rather, “[r]elief under  
5 the CLRA is specifically limited to those who suffer damage, making causation a necessary  
6 element of proof.” *Id.* (quoting *Wilens v. TD Waterhouse Grp., Inc.*, 120 Cal. App. 4th 746, 754  
7 (2003)). In their motion, Plaintiffs cite only one case in support of their argument that section  
8 1780 provides a measure of damages: *Pickman v. Am. Express Co.*, No. C 11-05326 WHA, 2012  
9 WL 258842 (N.D. Cal. Jan. 27, 2012). But *Pickman* is distinguishable, because there, the district  
10 court found that the defendants had satisfied the amount in controversy requirement upon removal  
11 “by multiplying the minimum amount of damages to be sought under the CLRA (\$1,000) by the  
12 number of alleged violations (5,001).” 2012 WL 258842, at \*2. While Plaintiffs could perhaps  
13 use *Pickman* as a guide in calculating their CLRA damages, the case does not negate the need for  
14 a showing of causation.

15 Accordingly, the Court finds that the Statutory Damages Model does not satisfy the  
16 requirements of Rule 23(b)(3) as set forth in *Comcast*.

#### 17 **vi. Nominal Damages Model**

18 Last, Plaintiffs contend that “with respect to all claims of the classes,” they may be entitled  
19 to nominal damages, which can be calculated on a classwide basis. Mot. at 21 (“the Nominal  
20 Damages Model”).

21 “When a breach of duty has caused no appreciable detriment to the party affected, he may  
22 yet recover nominal damages.” Cal. Civ. Code § 3360. In reply, Plaintiffs argue that “[t]he  
23 Sherman Law imposes a duty on Defendant to comply with federal food labeling laws,” which  
24 Defendant has breached. Reply at 12 n.18. It is true that California’s Sherman Law imposes a  
25 “duty to avoid false or misleading labeling.” *See Ebner v. Fresh, Inc.*, 838 F.3d 958, 965 (9th Cir.  
26 2016). Still, Plaintiffs cite no case in which a court looked to nominal damages to satisfy the  
27 predominance requirement under Rule 23(b)(3), and courts in this district have not been inclined  
28 to do so. *See Jones*, 2014 WL 2702726, at \*23 (finding that plaintiffs failed to “point to any

1 CLRA case permitting nominal damages, let alone a CLRA class action”); *Brazil v. Dole*  
2 *Packaged Foods, LLC*, No. 12-CV-01831-LHK, 2014 WL 5794873, at \*14 (N.D. Cal. Nov. 6,  
3 2014) (citing *Jones* and noting that the plaintiff “cites no authority to suggest that a damages class  
4 should remain certified solely because nominal damages may be available, even though the class  
5 would otherwise be properly decertified”); *Khasin*, 2016 WL 1213767, at \*4 (noting plaintiff’s  
6 failure to “cite[] a single case demonstrating that nominal damages are available under his causes  
7 of action”).

8 Given the lack of support for this argument, the Court finds that the Nominal Damages  
9 Model does not satisfy the requirements of Rule 23(b)(3) as set forth in *Comcast*.

#### 10 **vii. Conclusion**

11 Because Plaintiffs have not shown that the economic harm they allegedly sustained as a  
12 result of the alleged misbranding is capable of measurement on a classwide basis, the Court denies  
13 class certification under Rule 23(b)(3).

#### 14 **D. Appointment of Class Representatives and Class Counsel**

15 Because the Court finds that Plaintiffs meet the commonality, typicality, and adequacy  
16 requirements of Rule 23(a), the Court appoints Plaintiffs as class representatives. Specifically, the  
17 Court appoints Plaintiff Ang to be a class representative for all four classes, and appoints Plaintiff  
18 Streit to be a class representative for the Whole Grain Class and the Whole Wheat Class.

19 When a court certifies a class, it must also appoint class counsel, giving due consideration  
20 to: (i) the work counsel has done in identifying or investigating potential claims in the action; (ii)  
21 counsel’s experience in handling class actions, other complex litigation, and the types of claims  
22 asserted in the action; (iii) counsel’s knowledge of the applicable law; and (iv) the resources that  
23 counsel will commit to representing the class. Fed. R. Civ. P. 23(g)(1)(A). A court may also  
24 consider “any other matter pertinent to counsel’s ability to fairly and adequately represent the  
25 interests of the class.” Fed. R. Civ. P. 23(g)(1)(B). The Court is satisfied that Plaintiff’s counsel  
26 has sufficient experience litigating food labeling claims. *See* Dkt. Nos. 102-2, 102-5. Given their  
27 diligence in prosecuting this action to date, the Court appoints the Fleischman Law Firm, PLLC  
28 and Barrett Law Group, P.A. as co-lead counsel, and Pratt & Associates as local counsel, as

1 requested. *See* Mot. at 24.

2 **E. Disposition**

3 In sum, the Court grants in part and denies in part Plaintiffs' class certification motion as  
4 follows: Plaintiffs' motion is granted under Rule 23(b)(2) as to all four classes, and denied under  
5 Rule 23(b)(3).

6 **II. DEFENDANT'S MOTION FOR SANCTIONS**

7 Next, the Court turns to Defendant's motion for terminating sanctions against Plaintiff Ang  
8 and his counsel for spoliation. The motion is denied.

9 The following facts are material to deciding the sanctions motion. In early April 2013,  
10 Defendant sent Plaintiffs' counsel a preservation notice, demanding that they and Plaintiff Ang  
11 maintain certain evidence relating to the lawsuit, including: (1) all receipts for purchases of  
12 products directly at issue in the complaint; (2) all receipts relating to any purchase of bagels,  
13 whole wheat bread, sweet bakery goods, or pizza crust not sold by Defendant; and (3) all existing  
14 receipts for all food purchased during the class period. Dkt. No. 138-1 (Declaration of David W.  
15 Skaar, or "Skaar Decl."), Ex. B.<sup>11</sup> In October 2013, during discovery, Plaintiffs took the position  
16 that they did not have a "continuing obligation to produce documents relating to future purchases  
17 of food products throughout the course of this litigation," but agreed to produce all documents  
18 relating to the products named in the complaint. *Id.*, Ex. F. Defendant disagreed on the basis that  
19 those documents would be relevant to causation, reliance, and damages. *Id.*, Ex. E. In February  
20 2015, during Plaintiff Ang's deposition, he testified that he had not been saving his food purchase  
21 receipts since the litigation started. In early May 2015, Defendant sent Plaintiffs' counsel a letter  
22 regarding this "destruction of relevant evidence." *Id.*, Ex. I. Plaintiffs' counsel again took the  
23 position that they did not have any obligation to maintain grocery receipts from the pendency of  
24 the litigation. *Id.*, Ex. J. In August 2015, Defendant filed this motion.

25 A party who violates its duty to preserve relevant evidence, and destroys such evidence, is  
26

27 \_\_\_\_\_  
28 <sup>11</sup> Defendant also demanded that Plaintiff Ang keep "[a]ll packaging relating to the products (and  
any products remaining in such packaging)," which effectively amounted to a request for him to  
indefinitely maintain some of his household trash. *See* Skaar Decl., Ex. B.

United States District Court  
Northern District of California

1 subject to sanctions. *In re Napster, Inc. Copyright Litig.*, 462 F. Supp. 2d 1060, 1066 (N.D. Cal.  
2 2006) (“If a party breaches its duty to preserve evidence, the opposing party may move the court  
3 to sanction the party destroying evidence.”). The moving party must show that: (1) the party with  
4 control over the evidence had a duty to preserve it at the time that it was destroyed, (2) documents  
5 were destroyed knowingly, and (3) the evidence was relevant to claims or defenses at issue.  
6 *Apple, Inc. v. Samsung Elecs. Co., Ltd.*, 881 F. Supp. 2d 1132, 1138 (N.D. Cal. 2012).

7 Defendant’s sanctions motion is not well-taken. All discovery disputes in this matter were  
8 referred to Magistrate Judge Cousins on March 17, 2014. Dkt. No. 60. If Defendant disputed  
9 Plaintiff’s explicit discovery position, it should have timely raised the issue with Judge Cousins.  
10 Plaintiffs told Defendant that they were not going to produce any documents created during the  
11 pendency of the litigation. Defense counsel then did not act for nearly two years. Now,  
12 Defendant does not cite a single case holding that Plaintiffs had any continuing duty to maintain  
13 these purchase receipts. Instead, Defendant cites to Federal Rule of Evidence 401 for the  
14 definition of relevance. The Court does not find this argument persuasive.<sup>12</sup> Defendant’s motion  
15 is denied.

26  
27 \_\_\_\_\_  
28 <sup>12</sup> As the Court noted at the August 20, 2015 hearing on this motion, it is not at all clear that  
requiring Plaintiffs to preserve all of their grocery receipts going forward was a reasonable,  
proportionate request in the first instance. *See* Dkt. No. 148 (hearing transcript) at 5:15-8:6.

1 **III. CONCLUSION**

2 For the foregoing reasons, the Court **GRANTS IN PART** and **DENIES IN PART**  
3 Plaintiffs' motion for class certification: Plaintiffs' motion is **GRANTED** under Rule 23(b)(2) as  
4 to all four classes, and **DENIED** under Rule 23(b)(3). The Court also **DENIES** Defendant's  
5 motion for sanctions. Last, the Court **SETS** a case management conference for September 25,  
6 2018 at 2:00 p.m. The parties shall submit their joint case management statement by September  
7 18, 2018.

8 **IT IS SO ORDERED.**
